

FileMaker Server

The database server for growing workgroups.

ACCELERATE YOUR FILEMAKER PRO DATABASES

FileMaker® Server software, for Windows, Mac OS X, Mac OS and Red Hat® Linux delivers an outstanding database server for network administrators as well as for users of FileMaker Pro 5, 5.5 and now 6.

This high-performance relational database engine accelerates FileMaker Pro operations over a network both by increasing the speed of database operations and by allowing up to 250 simultaneous guests per server—while hosting up to 125 database files. These capabilities make it an excellent choice for departments and workgroups in any size business.

For administrators, this release of FileMaker Server delivers the ability to automatically update and deploy plug-ins to clients across the network. One update of a plug-in on the server updates all users of a FileMaker solution.

COMPATIBILITY AND FLEXIBILITY

Administrators will also appreciate the cross-platform support for TCP/IP which eases deployment for Windows, Mac OS X, and Mac OS workgroup guests. This flexibility and compatibility mean that FileMaker Server can fit into corporate environments seamlessly.

And while FileMaker Server software contains powerful tools for IS professionals, it's so easy to set up and run that nontechnical people will feel comfortable with installation and day-to-day server management.

The critical task of backing up FileMaker Pro databases on a regular basis can be automated and scheduled to be performed even while guests are connected.

Register FileMaker Server on your LDAP server for easy login from FileMaker Pro and tracking from the IT department.

Now your FileMaker Pro 5, 5.5 and 6 databases can run faster and be accessible to more users with the power of FileMaker Server.

- Auto update of plug-ins
- Scalable to 250* simultaneous guests
- Automate backups
- Easy to install and administer
- Multiple protocol support

Feature	Benefit
Auto update of plug-ins	Automatically update plug-ins on guests. Use powerful third party plug-ins with your FileMaker Pro solutions and deploy them to your guests.
Scalable deployment	Supports up to 250 guests simultaneously with up to 125 hosted files per server. Disconnect idle guests, allowing support of more than 250 occasional users.
LDAP directory support	Register FileMaker Server on your LDAP server for easy login from FileMaker Pro and tracking from the IT department.
Host single user files	Developers and administrators can work on the database files in single-user mode and FileMaker Server can be set to automatically host the files.
Automate backups	Automate the critical task of backing up your FileMaker Pro databases on a regular schedule while allowing guests to remain connected to the databases during the backup process.
Compatibility	Cross platform support for TCP/IP eases deployment for Windows, Mac OS X, and Mac OS workgroup guests.
Remote administration	Remote database administration function allows an administrator to keep track of users and files on the network, check workload levels, and monitor and review network file operation.
Easy to install and administer	Be up and running in less than 5 minutes with the easy to use graphical user interface for setting up and configuring your server.**

SYSTEM REQUIREMENTS

For Windows

- Pentium 133 MHz
- 64MB of RAM required for NT 4.0 (128MB of RAM required for Windows 2000)
- CD-ROM and hard disk drive
- Windows NT 4.0 (Service Pack 4), or Windows 2000.

For Mac OS X

- Apple G3 computer (excluding G3 upgrade cards)
- 128MB of RAM required
- CD-ROM and hard disk drive
- Mac OS X†

For Mac OS

- Power Macintosh computer
- 32MB of RAM required
- CD-ROM and hard disk drive
- Supports Mac OS version 8.6 through Mac OS 9.1.

For Red Hat Linux

- Pentium 133 MHz
- 64MB of RAM required
- CD-ROM and hard disk drive
- Red Hat Linux 6.2 or 7.0

For All Platforms

(Network Sharing Requirements)

- For Windows: Microsoft TCP/IP or IPX/SPX network
- For Mac OS X: TCP/IP
- For Mac OS: TCP/IP or AppleTalk network
- For Red Hat Linux: TCP/IP

*Up to 124 simultaneous guests for AppleTalk network protocol.

**Red Hat Linux version uses command line configuration only.

†Apple Events are not supported under Mac OS X.

FILEMAKER PRODUCT FAMILY

FileMaker Pro

Enables a single user to create, manage and share information and projects in workgroups of up to 10 guests.††

FileMaker Server

Increase network performance and centralize administration of FileMaker Pro files with up to 250 guests.††

FileMaker Pro Unlimited

Powerful Web database publishing for the business workgroup with support for leading Web servers.

Includes FileMaker Pro

FileMaker Developer

Author custom solutions for deployment via the Web, desktop, or a run-time application.

FileMaker Mobile

Synchronize your Palm OS handheld with your desktop FileMaker Pro 5 database with the click of a button. Requires FileMaker Pro 5.5 v.2 or 6

††Each FileMaker Pro guest requires an additional licensed copy of FileMaker Pro.
