

# FileMaker Go

Tackle any task on the iPhone and iPad

## Do more on the go

Tackle any task on your iPhone and iPad with FileMaker Go. Close sales deals on the road, manage project status while traveling, organize research notes in the field, or check inventory in the warehouse - all while you're on the go.

### What is FileMaker software?

FileMaker Pro is the leading easy-to-use software for creating databases that help you and your team tackle any task, quickly and easily. And FileMaker Go allows you to view, edit, and search your FileMaker Pro information on your iPhone and iPad.

### Getting started with FileMaker Pro and FileMaker Go

- Use FileMaker Pro on either a Windows or Mac computer to create databases – no programming experience required.
- Start by dragging and dropping your Excel spreadsheet onto FileMaker Pro or choose one of more than 30 Starter Solutions that can be customized for your device. Even build your own database from the ground up.
- Simply access your FileMaker Pro databases on FileMaker Go for iPhone or FileMaker Go for iPad via File Sharing in iTunes.

That's all it takes to start easily manage contacts, email status reports, track inventory, and view conference schedules while you're on the go!

### Sharing your databases

- Copy your databases and email them to others right from your iPhone or iPad.
- Host FileMaker Pro solutions on FileMaker Server to securely share information instantly with your team on FileMaker Go.

Whether you're on Windows, Mac, iPhone, iPad or the web, it's easy to share FileMaker Pro databases with your team across multiple devices and platforms.

Get started tackling your tasks on the go today.

FileMaker Go for iPhone: \$19.99

FileMaker Go for iPad: \$39.99

**Language** - English, French, Italian, German, Spanish, Japanese, and Simplified Chinese

### FileMaker Go Requirements

- Compatible with iPhone, iPod touch, and iPad. Requires iOS 4.2.1 or later.
- Requires FileMaker Pro or FileMaker Pro Advanced to create or modify databases.\*
- FileMaker Go connects to databases hosted by FileMaker Server 11 and 10/Server 11 and 10 Advanced and FileMaker Pro 11 and 10/Pro 11 and 10 Advanced.

\*While FileMaker Pro 8.5, 8, and 7, FileMaker Pro Advanced 8.5, and 8, and FileMaker Developer 7 are technically compatible, they are no longer supported by FileMaker, Inc.

### Top FileMaker Go Uses

- Conduct inventory checks in the warehouse
- Generate sales orders at a customer site
- Track shipping and receiving
- Check in event attendees onsite
- Update project status while traveling
- Verify student class schedules in the hallway
- Add research notes in the field
- Evaluate teacher performance in the classroom

*"Setting up FileMaker Go was virtually effortless. I did everything I needed to do on the desktop version and just copied it over to FileMaker Go on the iPhone. It works just as well on the iPhone as it does on the desktop."*

Larry Nichols, Orca Books

*"Performance-wise, FileMaker Go runs as well as its desktop/notebook parent. It works great. The performance is as expected. I build it on the desktop and when I push it to the iPad, it behaves the way I expect it to behave. It's a good feeling knowing that mobile development will be so straightforward from now on."*

Sterling Rouse, 360Works
