

FileMaker 12 Product Line

For iPad, iPhone, Windows, Mac, and the web

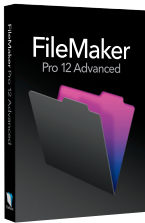

FileMaker Pro 12

What is it: FileMaker Pro 12 is the newest version of the leading easy-to-use database software for iPad, iPhone, Windows, Mac, and the web.

Who uses it: Individuals, businesses, non-profit organizations, educational institutions, and corporate workgroups.

What is it used for: FileMaker Pro 12 helps you and your team get any task done faster. Build a custom solution or use one of the many Starter Solutions included in the product to help you with:

- | | | |
|-----------|--------------------|----------------|
| Contacts | Event Management | Tasks |
| Inventory | Content Management | Research Notes |
| Projects | Invoices | Estimates |

FileMaker Pro 12 Advanced

What is it: FileMaker Pro 12 Advanced includes all the features of FileMaker Pro 12 plus a suite of advanced development and customization tools.

Who uses it: People who want more tools to help them design and maintain customized databases for themselves or their team.

What it is used for: FileMaker Pro 12 Advanced is used to build more powerful and customized databases faster with ease:

- **Design and develop databases faster and easier** with Custom Menus, Custom Functions, and more.
- **Monitor more efficiently** using the interactive Script Debugger and powerful Data Viewer.
- **Modify and maintain databases** with ease using the advanced Database Design Report and Multiple Table Import.

FileMaker Go 12

What is it: FileMaker Go is the leading business database app for iPad and iPhone and can be downloaded for free from the iTunes App Store.

Who uses it: Anyone that wants to get more done while on the go and easily share information with their team.

What is it used for: Tackle any task for your business or professional life. Collaborate with team members, integrate with external data sources while utilizing industry-standard security.

Check inventory in the warehouse, update patient medical records while making rounds, create invoices during client visits, or organize research notes in the field.

FileMaker Server 12

What is it: FileMaker Server 12 is the newest version of the fast, reliable, easy-to-use server software for groups of FileMaker Pro and FileMaker Go users over a network or on the web.

What does it do: FileMaker Server 12 lets you share your databases with unrivaled availability, security, and performance.

When should you use it: When you want secure, reliable sharing or you have more than 9 FileMaker Pro users. FileMaker Server 12 allows up to 250 FileMaker Pro clients to access the same database simultaneously.

- **Easy installation and administration** – Basic installations take just 20 minutes or less. Manage your databases remotely.
- **24/7 reliability and availability** – Get anytime access to your data with 24/7 availability.
- **Industry-standard security** – Authentication via Active Directory/Open Directory and use SSL encryption for secure data transfer.
- **Custom Web Publishing** – Create custom, data-driven websites using PHP and XML. Get up to 200 concurrent web connections.

FileMaker Server 12 Advanced

What is it: FileMaker Server 12 Advanced includes all the features of FileMaker Server 12 plus extended sharing capabilities.

What does it do: Whether over a network or on the web, FileMaker Server 12 Advanced maximizes your database sharing and connectivity capabilities, easily and securely.

- **Sharing** – FileMaker Server 12 Advanced technology does not limit the number of FileMaker Pro clients. Technical limits are imposed only by your hardware, database design, and operating system.*
- **Administrator Groups** – Assign specific server access privileges while retaining exclusive control of your databases. The Group Start Page displays a list of all databases accessible to your team on one convenient web-based page.
- **Instant Web Publishing** – Easily publish and share databases over the web with up to 100 concurrent web users.**
- **ODBC/JDBC Support** – Share data with other applications via server-based ODBC/JDBC support.

* Note performance may vary based on database architecture and complexity.

** FileMaker Server 12 Advanced supports up to 100 simultaneous Instant Web Publishing users versus a maximum of 5 simultaneous web users with a FileMaker Pro client.

FileMaker Pro

Minimum Requirements

Windows 7† 1 GHz or faster, 1GB RAM, 2GB RAM recommended, 1024x768 or higher resolution video adapter and display, DVD drive for box product

Windows Vista (Service Pack 2)† 1 GHz or faster, 1GB RAM, 2GB RAM recommended, 1024x768 or higher resolution video adapter and display, DVD drive for box product

Windows XP (Service Pack 3)† 700MHz or faster, 256MB RAM, 2GB RAM recommended, 1024x768 or higher resolution video adapter and display, DVD drive for box product

OS X Lion 10.7† Intel-based Mac, 2GB RAM, 1024x768 or higher resolution video adapter and display, DVD drive for box product

Mac OS X 10.6† Intel-based Mac, 1GB RAM, 1024x768 or higher resolution video adapter and display, DVD drive for box product

Top New Features in FileMaker Go 12 for iPad and iPhone

Get more new features to share information on your iPad and iPhone.

- **New! Multitasking support** – When you return to working in your database from other apps, FileMaker Go picks up right where you left off.
- **New! Improved media integration** – Record video or audio from your iPad and iPhone and add it directly to a container field. Play back media directly from FileMaker Go.
- **New! Export data in multiple formats** – Export your data from FileMaker Go in several new formats including Excel, CSV, TAB, dbase, HTML or a merge file.
- **New! Enhanced container fields** – When hosting databases on FileMaker Server, instantly stream movies and music from your device without any data storage limit concerns.

Top New Features in FileMaker Server 12 and FileMaker Server 12 Advanced

Get new features to improve the speed, stability, and performance of your FileMaker solutions.

- **New! Faster WAN performance** – Get faster data retrieval – less data is sent across the network with fewer round trips.
- **New! 64-bit application** – More memory allows for faster and more efficient data access. Only data changes are written to the disk.
- **New! Progressive Backup** – The data that has changed in the database is bundled and applied to the baseline backup. Choose a backup frequency between 1-60 minutes.
- **New! Improved web publishing engine** – The newly rewritten web publishing engine has the ability to handle multiple data requests at the same time, and has more efficient memory management.
- **New! More stable architecture** – Scripts and plug-ins run together as a separate process. Progressive Backups run independently as well.
- **New! Progressive media download** – Progressively download videos and other media to your FileMaker Pro client. Flip through records without waiting for files to completely download.

New in FileMaker Server 12 Advanced

- **New! Group Start Page** – Display a list of all databases accessible to your team on one convenient web-based page.
