Bento for iPad

Organize contacts, track projects, plan events, and manage things – all in one easy to use iPad app!

Meet Bento for iPad

Bento for iPad is one of the top iPad apps and the most popular personal database for iPad.

Organize contacts, track projects, plan events, and manage things – all in one easy to use iPad app that you can use standalone or synchronize with Bento for Mac!

Get started in seconds

Bento for iPad includes 25 pre-designed templates that are ready to use at work, home, school, and in your community. Easily customize them to organize virtually any type of information you have.

Get in touch with your details

View your information in exciting new ways thanks to support for new iPad gestures. Plus, with Bento for iPad, you can simply touch the screen to edit information in choice fields, date fields, rating fields, and checkboxes. A quick tap lets you watch videos, view photos, files, and send emails. Even browse web links in Safari without leaving Bento and record voice memos with quick tap.

Minimum Requirements

- Apple iPad
- iOS 4.2 software update
- Runs standalone, but if you'd like desktop synchronization, it requires a Wi-Fi wireless network connection and Bento 3.0.4 or Bento 4 for Mac (sold separately)

Bento for iPad is available in English and localized versions that run in French, Italian, German, Spanish, Dutch and Japanese.

Big, beautiful Bento

Bento for iPad is based on Bento for iPhone and has been enhanced to make the most of the big, beautiful iPad screen. The details stored in Bento are now larger and easier to read. In landscape, a split screen view shows both a complete records list and a single record's details simultaneously. Rotate the iPad to portrait to focus on one record at a time. Enter numbers with ease, thanks to the large, custom onscreen keyboard. Even view photos, movies, and Adobe® PDF files stored in Bento media fields. Plus, Bento for iPad includes background themes with coordinated fonts designed specifically for iPad to make your data look better than ever on the larger screen.

Stays in sync

Similar to Bento for iPhone*, Bento for iPad is a great standalone app. It also synchronizes directly with Bento running on a Mac, so you can automatically keep your desktop and iPad up-to-date whether editing your information on your Mac or iPad.

* Bento for iPhone is sold separately and runs on the iPhone, iPod touch, and iPad in its original unmodified size.

Organize contacts, track projects, plan events and manage things – all in one iPad app that you can use standalone or synchronize with Bento for Mac!
