

FileMaker Factsheet

FileMaker, Inc. provides a unified platform to create and deploy custom apps for mobile, cloud, and on-premises environments.

An Apple Subsidiary for over 20 years

Security

Secure data with AES 256-bit encryption, SSL encryption, and SSL certificates. Authenticate via Active Directory, Open Directory, or OAuth 2.0 identity providers.

Integration

FileMaker apps can easily integrate with existing systems and workflows via REST APIs, JSON, cURL, ODBC/JDBC, and SQL.

Scalable

FileMaker Server supports up to 500 simultaneous users on-premise. FileMaker Cloud supports up to 100 simultaneous users via the AWS Cloud.

Multi-platform

Apps created on the FileMaker Platform work natively on iPad and iPhone devices, Windows, Mac, and the web.
